TO OUR CUSTOMERS:

Thank you for your interest in our products. We are pleased to offer you a complete line of quality fly tying materials. We feel they are the best available and invite you to compare quantity, quality, and price. The materials listed here are neatly packaged and labeled for pegboard display. Our labels are state of the art and feature all product information such as size, color, weight, length, etc. They also have U.P.C. Bar Codes. We will customize them to show your shop name, phone number, logo or even your retail price.

TO QUALIFY AS A CUSTOMER

You must have a retail sporting goods outlet with a storefront, a Federal Tax I.D., or a retail sales tax permit. We do not sell to commercial or custom fly tyers, fly-fishing clubs, internet or mail-order only businesses or retail. We will refer retail inquiries to the nearest Wapsi dealer.

TERMS

We accept Visa, Mastercard and Discover; please call for possible conditions. Open account terms are NET 30 days from the date of your invoice. Prices are subject to change without notice.

PAST DUE ACCOUNTS

Accounts past due are charged 1 1/2% interest per month. Pre-pay accounts will be charged 1 1/2% interest for any order still in our warehouse 30 days after the invoice date. No products will be shipped to overdue accounts. All past due accounts will be placed on C.O.D. for future orders. There will be a \$25.00 service charge on all returned checks.

WHEN PLACING AN ORDER

Give the complete product code which may include size and color numbers. Orders will be filled according to the product code given. ANGLERS IMAGE and WAPSI products can be ordered together.

PHONE, FAX AND E-MAIL ORDERS

Phone orders will be taken Monday thru Friday between the hours of 8:00 A.M. and 4:30 P.M. CST. Fax orders may be sent at any time. Use our 24 hour toll free fax number 1-800-425-9599 or E-Mail to customerservice@wapsifly.com.

MINIMUM ORDERS

This is a dealer's catalog. Prices listed here are at your cost. Initial order must net \$250.00, reorders \$100.00. Foreign orders must net \$300.00. You may combine orders from the WAPSI Catalog and the ANGLERS IMAGE Catalog to meet this minimum.

RUSH ORDERS/BACK ORDERS

We fill orders in their order of receipt only. To avoid delays, please order early. We will not back order unless specifically requested.

RETURNS

Call or E-Mail us for a return authorization. All returns must be made within 10 days of the receipt of your order, have our return authorization number and be in their original condition and packaging. Postage is refunded on returns caused by our error only. Other returns will be subject to a minimum restocking charge of \$5.00 or a maximum of 15%.

SHIPPING

All products are shipped F.O.B. Mountain Home, Arkansas.

We reserve the right to choose the shipping carrier for best possible delivery of your order.

QUALITY GUARANTEE

Your satisfaction is guaranteed. If you are not completely satisfied, return your purchase within 10 days in its original condition and packaging. We will either refund your money or credit your account (whichever you desire). If there is a shortage or error, we must be notified within 10 days of receipt of materials or no credit will be issued.

CALIFORNIA PROPOSITION 65 WARNING

California Proposition 65 is a "right to know" law that entitles citizens of the State of California to special warnings for all products that contain any of 850+ chemicals known by the State of California to cause cancer or reproductive harm when such chemicals are present in a product in excess of the allowable established limits, or otherwise recognized by the State of California.

Wapsi Fly is fully committed to providing the highest quality products that are safe for their intended use by our customers and that comply with applicable law. And while we fully stand behind the safety of our products and while we do conduct testing of certain product categories for purposes of detecting the presence of certain chemicals from California's List of Chemicals, we cannot possibly test all of our products for each of the 850+ chemicals known by the State of California to cause cancer, birth defects, and other reproductive harms. As an alternative to such testing, and to ensure compliance with California Prop 65 labeling requirements, we have elected to enclose a warning label for all applicable products that ship into the State of California.

We care about our customers' safety and hope this information helps you with your decision when purchasing products from Wapsi Fly. The current list of chemicals that are "known" by the State of California to cause cancer, reproductive harm or birth defects, as well as other information regarding California "Prop 65" can be accessed at <http://oehha.ca.gov/prop65.html>

LIGHTNING STRIKE[®] INDICATORS

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Palsa indicators are our best-selling strike indicators. They are the original adhesive, stick-on-indicator and are economically priced. Designed for stealth their small size, and ultra-lightweight, foam construction, ensure that they land upon the water softly. Another benefit of Palsa Indicators is that they are so easy to apply to the leader, even after the fly is tied on. Just peel them off the paper backing and stick them to your leader. Removing them is just as easy - simply pull them off the leader. Palsa indicators are available in white and 4 Hi-Vis, fluorescent colors. 24 indicators per package.

Stick-On indicator fans have been asking for a larger, football shaped, stick-on indicator and here it is - we call it the "Bigdicator". Measuring 1" in length, the Bigdicator is easy-to-see, streamlined to cast, and offers the floatation needed for tungsten nymphs and heavy split-shot in fast water. Like all of our stick-on indicators, the Bigdicator has a special, light-weight fluorescent color-coating that makes them the brightest indicators on the water. Available in white, (3) Hi-Vis fluorescent colors, and a multi-color assortment. 16 indicators per package.

LIGHTNING STRIKE INDICATORS

"Ultimate adjustability" - that is a term we like to use when describing this indicator and it is probably one of the main reasons it is a best-seller. The slit in the side of the indicator makes it easy to put on the leader (even with a fly attached) and the fluorescent gasket securely locks it in place. Adjusting the indicator is as easy -- grab it firmly and slide it into the desired position. The football shape makes for easy casting and easy pick up off the water's surface. The Hi-Vis colors are easy to see even in heavy riffled water. Available in 4 sizes and 5 colors. 4 per package. Instructions included.

This indicator is one of our best sellers and is a "must have" for shops all across the country. Our football indicators are super-buoyant, highly visible, durable, and securely peg into place on even the smallest diameter tippet material. The aerodynamic shape makes for easy casting, even with the largest size indicator. Available in 4 sizes and 6 color options there is an indicator for every need -- whether it is fishing midges in flat, shallow water or fishing large, heavy stonefly nymphs on western freestone rivers. 6 indicators with pegs included in every package.

New!

This is the "go to" (old school) standard for many avid nymph fishermen. Ball indicators are economical, easy-to-thread onto your leader, and securely peg in place even on small tippets. They are super easy to adjust, float high, and cast well. Available in 7 sizes and 4 colors. There is an indicator in this offering for every fly weight. 6 indicators with pegs included in each package except in size 3/4" and 1" which have 4 indicators per package. Instructions included.

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Stick-on style indicators are a favorite of many anglers. With this in mind, we created our Nymphdicator Stick-On Indicators to be an economical, all-purpose indicator appropriate for most nymphing situations. They are larger than a Palsa and sport a football-shaped design that floats high, and is easy to cast. We manufacture these indicators with a special, light-weight, waterproof, fluorescent color coating that makes them the brightest indicators on the water. Nymphdicators are available in white, (3) Hi-Vis fluorescent colors, and a multi-color assortment. 18 indicators per package.

Our Midedicators are the answer to the problem of fishing hard-to-see midges and nymphs. Midedicators are small, adhesive foam, football-shaped indicators that peel and stick onto your leader above the fly. For anglers struggling with "aging eyes", they make it possible to fish tiny flies effectively again. Midedicators are available in white, (3) Hi-Vis fluorescent colors and a multi-color assortment. 24 indicators per package.

Indicator Dots are micro, adhesive foam discs (dots) that can be stuck directly to a large dry fly or terrestrial to make it more visible on the water. Dots of contrasting colors can also be stuck to other varieties of indicators to make them more visible in varying light conditions or to add floatation. Each package contains 1/8" (small) and 5/32" (medium) dots. Great value! Approximately 100 dots per package!

LIGHTNING STRIKE INDICATORS

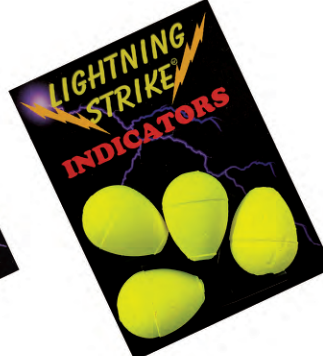

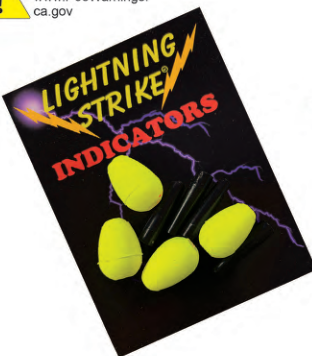

Our teardrop indicators are designed for maximum floatation while still maintaining a compact size. The bottom of the indicator is larger than the top to ensure the indicator rides level on the water's surface when it is under load from heavy flies and/or split shot. An added benefit of this design is that the top of the indicator often "tips-up" when a fish strikes. The extra buoyancy gained from its unique design makes the indicator easy-to-see. The slit in the side of the indicator makes it easy to put on the leader (even with a fly attached) and the fluorescent gasket securely locks it in place. Available in 4 sizes and 3 highly visible colors. 4 per package. Instructions included.

Every indicator "style" has its devotees and our Teardrop Indicators are the answer for "peg indicator fans" who want an indicator that floats high, is easy-to-see, and holds a lot of weight. They are an excellent choice for drifting jigs, stonefly nymphs, and multiple split-shot configurations. Like all peg indicators, they are easy to thread onto the leader, super easy to adjust, and stay securely in place when pegged. The indicator's shape is designed so that the top of the indicator will (often) "tip-up" when a fish strikes. Our Teardrop Indicators with Pegs are available in 5 sizes and 4 highly visible colors. 4 indicators per package except 1" which has 3 indicators per package. Instructions included.

These unique, versatile indicators can be rigged two different ways: 1) as a conventional pegged indicator for use in shallow water, and 2) as a slip-strike indicator for use in deep water. The instructions included detail a special rigging technique utilizing a hollow peg that allows the indicator to slide freely on the leader after the hookset - making it easy to bring a fish to the net. Available in 3 sizes and 3 easy to see colors. 4 per package.

Skip's Original Turn-On Strike Indicators were developed in 1990 by Skip Halterman and are the first strike indicators to receive a U. S. patent for their ingenious, cutting edge design. In recent years, Skip has improved the design and now the product is more durable, floats higher, and is more visible than ever before! Turn-On's are extremely easy-to-install and are reusable again-and-again. They can be removed or repositioned on the leader without any kinking of the leader whatsoever. Three simple twists of the indicator and they are securely locked onto the leader. Turn-On's are available in 3 sizes and 4 colors. Packaged 4 per package. Instructions included.

Jerk Alert Indicators are the "ultimate evolution" of the popular Turn-On Strike Indicators. Based on the same patented system as the Turn-On Indicators, Jerk Alert's have a redesigned locking system, offer improved floatation and visibility than Skip's Original Turn-On Indicator. True to the original design, they are easy to put on/take off, lock securely onto the leader, and are easy to reposition. Jerk Alert's are available in 2 sizes and 4 colors. White is a popular color for anglers fishing on heavily pressured fisheries. The 3 Hi-Vis colors are ideal for all light conditions. 4 per package. Instructions included.

Yarn indicators are a favorite of many nymph fishermen. When rigged correctly and matched to the weight of the fly, they are considered one of the softest landing, most sensitive indicators. An added benefit is that they are very easy to mend in cross-currents. Our Bio Indicator yarn is biodegradable and is dyed in house to ensure bright, permanent colors. The indicators are pre-treated with high-floating Watershed to maximize floatation. Bio Indicator Yarn is available in 3 colors and each package contains 3 ft. of yarn. Rigging instructions are included.

POLY YARN INDICATORS

STRIKE INDICATORS

Our Poly Yarn Indicators are made with the highest quality, most buoyant polypropylene yarn available. Like our Bio-Indicator Yarn, they come pre-treated with a high floating Watershed™ treatment to maximize flotation. The indicators attach easily to the leader by use of a small rubber O-ring and can be easily repositioned when needed. Poly Yarn Indicators are at their best when fishing large, heavy nymphs in fast or deep water. Our Poly Yarn Indicators are available in 5 colors for varying light conditions and each package contains 4 indicators. Instructions included.

ANGLERS IMAGE® FLY BOXES

CUSTOM LOGOS

Free custom logo imprinting on all Anglers Image® fly boxes.

No setup charge and no additional fee per box. A minimum order of 50 total boxes per logo qualifies. The fifty boxes can be any assortment of size and style.

Send a copy of your logo to Logo@wapsifyfly.com. Images need to be black and white and 300 D.P.I. or higher. While plates can be made from the exact size which is approximately 2" wide X 1" tall, it is better when artwork is larger. Three times the finished size is ideal. Please send in jpeg, png, gif, psd, eps or tif format.

DAVE WHITLOCK SIGNATURE MUGS

These beautiful mugs feature the artwork of world famous artist and fly fishing writer Dave Whitlock. Dave has spent his life applying his passion and talents to the sport and art of fly fishing. Through his studies, teaching, writing, photography, illustrations and paintings he captures fish..... not only with a fly..... but with his eyes and his art. Dave sees the beauty and "personality" in each fish and is a master at portraying this on paper and canvas.

We are pleased to offer Dave's artwork on these unique mugs. Each premium ceramic coffee mug is a hefty 15 ounces with a large easy to grip handle and steady base. They are microwave and dishwasher safe.

Please include product code when ordering.

Cutthroat Trout (ACC6CT)

We are sad to report that Ann and Tom Schmuecker, the long-time owners of Wapsi Fly, passed away in February and March 2023.

After a stint in the U. S Army, Tom married Ann in 1959 and earned a business degree from University of Iowa in 1961. He ran Pinehurst Farms with his father and brother until 1973. Tom and Ann then bought a small company called Wapsi Fly and moved to Independence, Iowa with their 4 sons. They relocated their family and business in 1978 to Mountain Home, Arkansas. When asked, “why Mountain Home?” he explained that he placed a coffee cup on the map of the United States, looking for the place with the largest concentration of good fishing. This part of Arkansas, containing the White and Norfork Rivers, known for their plentiful and record-breaking trout, plus the area’s great lakes, fell within the rim of the cup. So, Mountain Home became the new home of Wapsi Fly and the Schmuecker family.

Once in Mountain Home, Tom and Ann stopped producing flies, focusing their attention on tying materials; the business quickly grew. It’s been said that it is almost impossible to tie a fly without using some product that comes through the Wapsi warehouse. While many fly-tying material suppliers have come and gone, Wapsi remains the largest in the world.

Tom created and brought to market incredibly popular and innovative fly-tying materials. He was a born tinkerer and spent many days in his workshop at Wapsi Fly, designing and devising methods for processing fly-tying materials.

They were well-respected leaders in the community and fly-fishing industry. Tom served on the board of directors for Baxter Regional Medical Center and the American Fly Fishing Tackle Manufacturers Association. He was also a recipient of many awards from the Federation of Fly Fishers, including the Lee Wulff Award for Outstanding Fly Fishing Business. The Southern Council of the Federation of Fly Fishers awarded Tom with the Fly Tyer of the Year Award, and the Fly Tyer Magazine gave him the coveted Lifetime Achievement Award.

Tom and Ann lived a long, vibrant life leaving behind many close friends. Tom was famously known for his dry wit and sense of humor. Ann loved to entertain, had a wonderful sense of humor and was a real prankster.

Wapsi has been left in good hands. Sons, Karl, who has been acting General Manager for many years and Joe, who is the Production Manager will continue to carry on the legacy of their parents.

Tom and Ann are greatly missed.
